SECTION 6.05
EAST BUTLER CREEK FOOTHILLS RURAL ZONING DISTRICT, MODIFIED
ZONING DISTRICT STANDARDS

INTENT

This district recognizes the need for an alternative to traditional large lot rural zoning. Traditional zoning that promoted the creation of large acreage lots for ranchettes has diminished the rural character and natural setting it was intended to preserve. Specifically, it is noted that large acreage tracts promote the following situations:

- Intensive grazing on tracts too small to be properly managed. This leads to over grazing, soil erosion, stream sedimentation, contamination of surface and ground water and weed infestation.
- Fencing of individual tracts which diminishes the feeling of openness characteristic of rural areas and restricts wildlife movement.
- Displaces viable agricultural operations with a series of highly visible suburban style homes.
- Free roaming dogs deplete the wildlife resource and severely limit the usable winter range. These same free roaming dogs prey upon and harass domestic livestock further threatening the viability of agricultural operations.
- Cause more intensive and less well managed use of irrigation water to the detriment of the other users and contributing to the de-watering of our rivers and streams.
- Create multiple access points onto rural roads adding to congestion and increased road maintenance costs as well as over-burdening other infrastructure such as bridges.
- Create a demand for increased bussing on the part of rural school districts.
- In the situation of wildland fires, emergency resources are diverted to structure protection rather than overall fire suppression.

This district further recognizes the need for close major transportation routes, schools and infrastructure.

Stabling of horses is recognized as an important part of the rural lifestyle. This district allows for the pasturing, stabling and riding of horses in a separate facility designed specifically for this purpose.

Diversity in housing types and price range is recognized as an important community goal. This district allows for the placement of attached housing within the site.
